EDUCATION

Pamantasan ng Lungsod ng Valenzuela 2022-2026 | **Metro Manila, Philippines** Bachelor of Science in Information Technology | Expected Graduation: 2026

TECHNICAL SKILLS

- Core Stack:** JavaScript (ES6+), React.js, Node.js, Express.js, React Native, HTML5, CSS3.
- Backend & Database:** RESTful APIs, WebSockets (Socket.io), NoSQL (Firestore/MongoDB), Google Authentication, JWT.
- Tools:** Git/GitHub, VS Code, Figma (Wireframing).

PROJECTS

- JuanVote Ecosystem (Capstone Project)** | Lead Backend & Full Stack Developer | Nov 2025
- System Architecture:** Architected the full-stack infrastructure for a cross-platform ecosystem comprising a Unity Android game, a React-based Admin Dashboard, and a public-facing transparency portal ("Halalan Tracker").
 - Real-time Connectivity:** Engineered a hybrid communication layer using **RESTful APIs** for dynamic game configuration and **WebSockets** to push live "Red Flag/Green Flag" voting analytics to the public dashboard without page refreshes.
 - Backend & Security:** Implemented **secure Google Authentication and JWT** for role-based access control and designed a **NoSQL database** schema to optimize data retrieval for player progress, leaderboards, and aggregate election stats.
 - Performance:** Established robust connections between the central database and multiple client interfaces, ensuring low-latency data fetching during high-traffic simulations.

- PluSizeByChubynita Website** | Front End Developer | Aug 2024
- Developed a responsive e-commerce frontend for a specialized fashion brand using **Vanilla HTML, CSS, and JavaScript**.
 - Custom UI:** Implemented a dynamic product showcase gallery using custom DOM manipulation and **CSS Grid/Flexbox** layouts, ensuring full responsiveness without relying on external UI frameworks.
 - Performance:** Optimized asset loading and script execution to ensure fast load times and a smooth user experience on mobile devices.

EXPERIENCE

- Red Cross Valenzuela City Chapter** | Full Stack Developer Intern & IT support | June 2025
- Project:** Developed a specialized company mapping system to monitor partner companies with expiring company related health certificates
 - Geospatial Integration:** Implemented an interactive **Street Map** interface to visualize company locations for logistics planning.
 - Logic Implementation:** Coded advanced filtering and sorting algorithms, enabling administrators to isolate companies by expiration date or contract status.
