PROFILE

Information Technology graduate with hands-on experience developing and deploying information systems and web/mobile applications. Experienced in requirements gathering, database-driven applications, CRUD functionality, authentication, dashboards, reporting, and stakeholder validation. Proficient in React, Node.js, Firebase, SQLite, and REST APIs, with a strong focus on problem-solving and developing practical software solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Native, Tailwind CSS, React Router

Backend: Node.js, Express.js, REST APIs

Database & Cloud: Firebase Firestore, SQLite, Firebase Authentication, Firebase Hosting

Development: Requirements Gathering, SDLC, CRUD Operations, Testing & Debugging, System Development

Tools: Git, GitHub, VS Code, Figma, Chart.js

AI Tools: ChatGPT, Claude, GitHub Copilot, Cursor

EXPERIENCE

Full Stack Developer Intern — Philippine Red Cross, Valenzuela City Chapter *June 2025 – October 2025*

React Native • SQLite

- Developed a React Native monitoring application deployed for internal use, giving staff visibility into 50+ partner companies across Valenzuela City.
- Gathered and validated system requirements with organizational stakeholders and translated operational needs into application features.
- Built a centralized dashboard for company records, active/inactive status, trainee counts, and operational statistics.
- Implemented CRUD functionality for company record management and health-certificate monitoring with renewal alerts.
- Integrated map functionality to support visualization of company locations and field coordination.
- Tested and validated application functionality with stakeholders and delivered a **production-ready system** that remains in internal use.

PROJECTS

JuanVote Ecosystem - *web platform for a Unity voter-education game*

Lead Full Stack Developer • Unity • React.js • Node.js • Firebase • Google Auth • JWT • Chart.js

- Built an Admin Web App and a real-time public results site, both synced to the Unity game via Firebase Firestore, letting admins manage voting schedules, candidates, and settings without rebuilding the game.
- Implemented secure administrator authentication using Google Authentication and JWT-based authorization.
- Built interactive dashboards visualizing player votes, candidate performance, and voting trends for presentations and reporting.
- Added Excel (.xlsx) report generation for historical voting data, including vote counts, candidate percentages, and voting periods.

Personal Portfolio Website - *personal site and case-study hub*

React.js • Vite

- Designed and built a responsive portfolio with reusable React components showcasing projects, skills, and experience.
- Added light/dark mode with persistent theme preferences; deployed via GitHub Pages.

Ecommerce Website - *responsive storefront front end*

Frontend Developer • HTML5 • CSS3 • JavaScript

- Built a responsive e-commerce site with dynamic product displays using CSS Grid and Flexbox for cross-device compatibility.
- Improved usability and load performance through optimized asset loading and front-end best practices.

EDUCATION

Bachelor of Science in Information Technology *Graduated: August 22, 2026*

Pamantasan ng Lungsod ng Valenzuela

ACHIEVEMENTS

- 2nd Runner-Up — University of Makati I.T. Skills Olympics (Game Development Category)
- Dean's Lister — 1st Sem AY 2022–2023, 2nd Sem AY 2023–2024, 1st Sem AY 2024–2025, 2nd Sem AY 2024–2025
