TIMOTHY JEROME FERARO

Junior Web Developer | Junior React Developer | Junior Front-End Developer

Metro Manila, Philippines | +63 991 978 8158 | timothy.work.10@gmail.com

Portfolio | GitHub | LinkedIn

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Native, Tailwind CSS, React Router

Backend: Node.js, Express.js, REST APIs

Database & Cloud: Firebase Firestore, SQLite, Firebase Authentication, Firebase Hosting

Tools: Git, GitHub, VS Code, Figma, Chart.js

EXPERIENCE

Full Stack Developer Intern

Philippine Red Cross – Valenzuela City Chapter **June 2025 – October 2025**

React Native • SQLite

- Developed a React Native monitoring application used internally by the Philippine Red Cross – Valenzuela City Chapter to manage and monitor more than 50 partner companies across Valenzuela City.
- Built a centralized dashboard that provides an overview of company records, including active and inactive companies, trainee counts, and operational statistics.
- Implemented health certificate monitoring to identify expired and upcoming certificate renewals, helping staff efficiently track company compliance.
- Integrated map functionality to visualize company locations and improve field coordination.
- Developed CRUD functionality for managing company records through an intuitive user interface.
- Collaborated with organizational stakeholders to gather requirements, validate system functionality, and deliver a production-ready application deployed for internal organizational use.

PROJECTS

JuanVote Ecosystem

Lead Full Stack Developer

Unity • React.js • Node.js • Firebase Firestore • Firebase Authentication • Google Authentication • JWT • Chart.js

- Developed the web ecosystem for a Unity-based voter education game, including an administrative dashboard and public results website integrated with Firebase.
- Built the Admin Web Application, enabling administrators to manage voting schedules, update candidate information, and configure game settings without rebuilding the Unity application.
- Developed a public results website that displays real-time voting data collected from the Unity game via Firebase.
- Designed Firebase Firestore databases to synchronize data between the Unity game and the web applications in real time.
- Implemented secure administrator authentication using Google Authentication and JWT-based authorization.
- Built interactive dashboards that visualize player votes, candidate performance, and voting trends for presentations and reporting.
- Implemented Excel (.xlsx) report generation for historical voting data, including vote counts, candidate percentages, and voting periods for reporting and presentations.

Personal Portfolio Website

React.js • Vite

- Designed and developed a responsive portfolio showcasing projects, technical skills, and professional experience.
- Implemented reusable React components and responsive layouts.
- Added light and dark mode with persistent theme preferences.
- Deployed the website using GitHub Pages.

Ecommerce Website

Frontend Developer

HTML5 • CSS3 • JavaScript

- Developed a responsive e-commerce website featuring dynamic product displays and interactive user interfaces.
- Implemented responsive layouts using CSS Grid and Flexbox to ensure compatibility across desktop and mobile devices.
- Improved website usability and performance through optimized asset loading and front-end best practices.

EDUCATION

Bachelor of Science in Information Technology **2022 – 2026**

Pamantasan ng Lungsod ng Valenzuela

ACHIEVEMENTS

2nd Runner-Up — University of Makati I.T. Skills Olympics (Game Development Category)

Dean’s Lister

- 1st Semester, Academic Year 2022–2023
- 2nd Semester, Academic Year 2023–2024
